Forecast for Friday 22 Dec 2023

Weather: Clear periods and further wintry showers overnight. Rather cloudy start to Friday with sleet or snow above about 700m and rain lower down. This will give way to brighter skies and a few showers later in the morning and during afternoon. The showers will fall as snow above about 500 to 600m.

Chance of cloud-free hill tops above 800m: 40% improving 80% later in morning.

Low Cloud and visibility: Good visibility with occasional cloud cover about 800 to 900m. Very poor visibility as sleet and snow showers come along, especially early on Friday with more extensive cloud cover lower down the hills.

Met Office Aberdeen Meteorologist's View
Very difficult walking conditions due to combination of low temperatures, strong winds and sleet/snow showers. Also tricky underfoot conditions.

Forecast for Saturday 23 Dec 2023
Weather: Cloudy with a period of snow even to low levels across eastern Cairngorms, Aberdeenshire and some of the Angus hills at first on Saturday with blizzard conditions on higher ridges and summits. Snow will gradually turn to rain at lower elevations from the south during morning then rain increasingly at all levels during afternoon and early evening.

Maximum wind: Lighter southwest winds at first, then strong to gale force westerly winds developing by afternoon, average speeds 30 to 40mph with gusts 55mph.

Chance of cloud-free hill tops above 800m: Little chance.

Low Cloud and visibility: Misty conditions with often very poor visibility and extensive cloud cover well down the hills. This will lead to navigational difficulties.

Temperature: **Glens:** 4 Celsius but close to freezing in north at first, rising to 7 Celsius by afternoon.
At 800m: Minus 2 Celsius rising to plus 5 Celsius in afternoon.
Freezing level: 500m but 200m in north of area at first, then rising above the summits during afternoon and evening.
